

# GEZANI INITIATIVES

Ward 13, Chiredzi South | Together for Today and Tomorrow

## 2026 AGRICULTURAL BULLETIN

Farming is the backbone of the Gezani economy. This year, we are implementing new strategies to combat changing climate patterns.

### Drought-Resistant Crops

Local agronomists recommend shifting 40% of cultivation to drought-resistant sorghum and millet varieties. Seed distribution will begin in early August.

### Livestock Management

The new community dip-tank is now fully operational. All cattle owners must register their herds by the end of the month to ensure access to subsidized vaccines.
